

An exhibition in Chybie

2022-01-04

Another location where you can admire the exhibition of photos taken as part of the LIFE.VISTULA.PL project is Chybie, a village near to Cieszyn.

Chybie is located in the Upper Vistula Valley. The village is located between the Goczałkowice Reservoir and large complexes of breeding ponds in Golysz and Ochaby.

The exhibition is presented in the most representative part of the village, in a park with a fountain, at the intersection of Dworcowa and Bielska Streets. Most of the photos can also be viewed at night, using the effective lighting of the fountain, which is important for a short day.

The exhibition will be on display until January 21, 2022.

A good atmosphere and company is provided to the visitors by a golden "Utopiec", who is sitting next to the exhibition, known as the "Szuwarek" (szuwar = eng. reed, szuwarek - someone who live in reeds). The fairy-tale character "inhabits" the wetlands in the Upper Vistula Valley, similarly to the plants and animals presented at the exhibition.
